Dear Healthcare Professional,

Thank you very much for taking the time to attend the CMSA presentation that was given on Tuesday February 10th at the Clubhouse in Oak Brook. I appreciate you taking the time out of your busy days to learn more about interventional pain procedures and what they can do for your patients to improve their quality of life.

As was clearly demonstrated by the data that was shared during this meeting, I have had great results in working with injured workers and getting them to return to work. The 2007 data that I presented on the functional capacity evaluations and return to work of work injured patients shows that we have at success here at Rush in treating injured workers.

If you are interested in more information about University Pain Centers please visit the website www.rushanesthesia.com and if you are more interested in some of the Medtronic specific procedures that I am doing please visit www.Medtronic.com.

I am always available to answer any questions or issues you may have and you can contact me by email at asokumar@aol.com or can help patients get to see me at the clinic by contacting University Pain Centers at 312-942-6631. In addition, you can book an appointment within a week by calling Dawn or Maria at 312-942-6449.

Thanks again for attending the lecture and I look forward to working with you in the future.

Asokumar Buvanendran, MD
Director of Orthopedic Anesthesia
Associate Professor
Department of Anesthesiology
